*TO CARE*

**“TRAP, TREAT,  
& RELEASE”**

**SHERMAN’S LOCAL  
EFFORTS FOR DISEASE  
AND POPULATION  
CONTROL**

## We are in need of:

- residents willing to allow trapping on their property
- donations to support the cost of the project
- donations in the form of:
  - cat food
  - storage totes
  - insulation material (to make cat houses)

### Benefits

The safe return of the cats keep new ferals from entering the neighborhood. They naturally keep the mice and other rodent population under control. The males no longer have the desire to spray and fight.

This project is contributing to the Village's desire to improve the health, safety, and welfare of the community. The prevention of feline over population helps prevent the spread of diseases, including exposure to domesticated cats. Cats are also known to transmit illnesses to people through scratches and saliva.

### Trap, Treat, and Release

The Little Angels Animal Sanctuary will provide the service of safely collecting stray cats, vetting them, and returning them, or relocating them.

This involves setting out traps at participating properties, transporting the cats to the veterinary clinic for spaying and neutering. The cats will be tested for feline illnesses and receive vaccinations for leukemia, rabies, and other contagious diseases. The cats will receive a flea treatment prior to their return home where they will be released into the community.

The cost for these services is \$45 per male and \$70 per female. This is dependent on the support of the community making donations and the Village of Sherman's \$950 commitment.

For information on humane trapping, go to: [www.feralcatfocus.org](http://www.feralcatfocus.org)

**Notices will be posted like the sample below with dates and contact information in the Post Office and in supporting businesses.**
